

Linealuce Mini creates a linear luminous band that is designed to illuminate surfaces evenly. In ground or wall recessed luminaire for exterior applications. Suitable for most architectural applications, available in 3 sizes that can be installed as single elements or in continuous rows.

Luminaire characteristics:

Power input: 3.5/ft (remote fixture only)
Lumens: Up to 230lm/ft (for 3000K, 80CRI)
Luminaire efficacy: Up to 65lm/W

Source:	White LED (LM-80 tested), 3000K: 80CRI, 4000K: 80CRI, >80% of initial lumens at 100 000 hours (L80).
Lumen maintenance:	
Optics:	Available in spot or flood optic.
Material:	Body: Extruded aluminum and die-cast aluminum end caps. Conection box: PPS (polyphenylene sulfide). Protective screen: 1/8" (3mm) sodium-calcium tempered sealing glass with silk screen. Hardware: Stainless steel screws and silicone gasket.
Mounting:	Wall or ground recessed with back box. Ground recessed installation must have 8" gravel below the luminaire to allow proper drainage.
Electrical:	See remote LED driver options on page 3.
Dimming:	Remote LED driver 0-10V, down to 10%.
Temperature of operation:	-22°F to 113°F (-30°C to 45°C).
Contact temperature:	Less than 104°F (40°C).
Load capacity:	Maximum static load 2200lbs (1000kg).
Finish:	Gray painted (RAL9007) with a high level of weather and UV resistance. The semi-gloss finish coating is electrostatically applied, durable acrylic enamel baked at high temperatures for superior color retentive finish.
Weight:	1.49lb/ft (0.67kg/ft)
Warranty:	5 year limited warranty.
Ratings:	IP67, IK109
Certification:	cULus listed for wet location

SUGGESTED WIRING DIAGRAM

The linealuce MINI integral electronic circuits are designed to eliminate voltage drop and are capable to providing constant light output with voltage as low as 19V.

MOUNTING AND DIMENSIONS

FEED OPTIONS (INCLUDED)

Choosing between right or left feed matters for the direction of a wall grazing application

R - Right feed

N - No feed (for in-line modules)

For in ground installation 8" of gravel below the luminaire is required to allow proper drainage. The appropriate flow of water away from back box is necessary to maintain the longevity of the system.

*M1 - Back box fro concrete installation

*M2 - Back box with 7 7/8" (200mm) safety cable for wall application

*Wiring box included

L - Left feed

CONTINUOUS ROWS EXAMPLE

Single elements can be combined to obtain a linear continuous row with a single feed point. Interconnecting power cable and hardware are preconfigured at the factory and supplied with the luminaires. To get the desired length, simply choose standard modules to combine (example: **A+B**). For in-line modules (**B**), no feed is required.

*Note that 2mm spacing minimum is required for continuous rows installation.
