Accessory code

B223: Wall attachment

Technical description

Wall attachment for Lavinia projector. The coupling is made of metal obtained through aluminium extrusion. The optical assembly is fixed to the pole top by two fixing screws. Two safety bolts make its application easier. This connection system makes it possible to adjust the inclination of the optical assembly with respect to the road surface by $\pm 15^\circ$ (in the UP position it can be adjusted upwards only). All screws are made of stainless steel.

Installation

The attachment is applied to the wall by two fixing screws.

Colour

Grey (15)

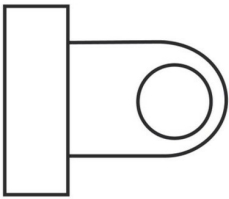

Weight (Kg)

0.96

Wiring

The safe passage of the power-supply cables for the optical assembly is ensured by removing the breakable walls.

Complies with EN60598-1 and pertinent regulations

850°C

IP66
