- EN** When planning the lighting and electrical system, determine the maximum permitted current, taking into account the following factors:
- the nominal current permitted by terminal blocks;
 - safety coefficient to allow for excess voltage and contemporaneity;
 - the nominal current absorbed by single art.
- It is recommended that the wires inside the cables are made to operate at the maximum values.
- FR** Lors de l'étude de projet de l'installation d'éclairage et de l'installation électrique, déterminer les courants maximaux admissibles en tenant compte des facteurs suivants :
- courant maximal admis par les borniers;
 - coefficient de sécurité tenant compte des surtensions et de la simultanéité;
 - courant nominal absorbé par les différents art.
- Il est conseillé de ne pas faire fonctionner les câbles aux valeurs maximales.
- ES** Durante la proyectación de la instalación luminotécnica y eléctrica, determinar las corrientes máximas permitidas, en consideración de los factores siguientes:
- corriente nominal permitida de las borneras;
 - coeficiente de seguridad para considerar sobretensiones y contemporaneidades;
 - corriente nominal absorbida por los art. individuales.
- Se aconseja evitar que los conductores de cables trabajen con valores máximos.
- IT** Nella progettazione dell'impianto illuminotecnico ed elettrico, determinare le correnti massime ammissibili, considerando i seguenti fattori:
- corrente nominale ammessa dalle morsettiere;
 - coefficiente di sicurezza per tenere conto delle sovratensioni e contemporaneità;
 - corrente nominale assorbita dai singoli art.
- E' buona norma evitare di far lavorare i conduttori dei cavi ai massimi valori.

EXAMPLE ELECTRIC CONNECTION

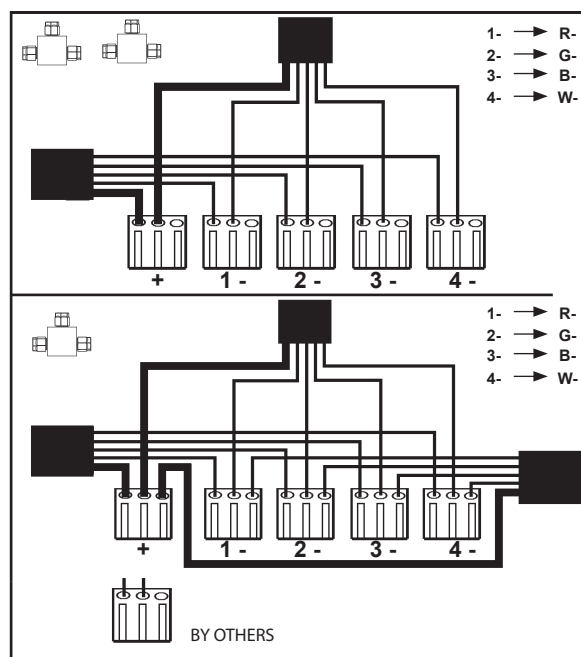

Diagram illustrating the electric connection for a lighting fixture. The fixture is connected to a power source (120-277V) and a control system (DMX) via a BOX. The BOX contains a PSU+, DRIVER, and DMX. The fixture is connected to the BOX via a cable (4543). The fixture is also connected to a power source (120-277V) and a control system (DMX) via a cable (4543). The fixture is connected to a power source (120-277V) and a control system (DMX) via a cable (4543).
